EuroAsiaSPI² 2022 Architecture

EuroAsiaSPI² 2022 (31.8.-2.9.2022) will have **10 international thematic workshop streams** supported by thematic topic communities. Each thematic stream **integrates both, research sessions and industry / applied science sessions**.

EuroSPI and the SPRINGER book allow to submit 3 types:
Full paper: ca. 12 to 15 pages, full elaborated case study, research study
Short paper: ca. 6-8 pages, addresses an important case study or research result
Key statement / poster: 4 pages, making a key experience/best practice statement

EuroAsiaSPI²2021
European & Asian Systems, Software, Service, Safety & Security Process Improvement & Innovation

CALL FOR PAPERS
for the

30th EuroAsiaSPI² Conference

EuroAsiaSPI² Call for Thematic Papers

Submitted papers are grouped into major topics which can be attended in form of workshops.

Emerging and Multidisciplinary Approaches to Software Engineering (AI, Machine Learning, Gamification)

Digitalisation of Industry, Infrastructure, and E-Mobility

SPI Manifesto and Good and Bad Practices

Functional Safety and Cybersecurity

Agile and Lean

Standards and Assessment Models

Accessibility, Team Skills and Diversity

Architectural Innovation & New Business Models

Virtual Reality / Augmented Reality / Mixed Reality

New Ideas for Funding Proposals

Medical - Big Data & IT Systems & Standards

Selected workshop papers are published as a special chapter in the annual EuroSPI SPRINGER book in the CCIS series. The EuroSPI series had so far 990000 chapter downloads in SPRINGER oline which makes it a widely known series referenced in industry and research.
Selected extended papers will be published in the WILEY Journal of Software: Evolution and Process.

Deadlines

...for a **Fully/Short/Key Statement Paper** :

17.04.2023 Upload First Version of Paper

15.05.2023 Review by International Programme
            Committee and Notification of Acceptance

19.06.2023 Camera Ready Version of Paper for Book

24.07.2023 Early Registration Deadline (All presenters must register, otherwise the contribution is deselected)

Further journal submission deadlines are online available.

Jointly Building an SPI Manifesto

In 2009 at the 16th EuroSPI conference an SPI Manifesto has been created which outlined the values and principles to make improvement really work:

https://conference.eurospi.net/images/eurospi/spi_manifesto.pdf

EMERGING AND MULTIDISCIPLINARY APPROACHES TO SOFTWARE ENGINEERING

Eengineering software products requires a vision of thinking across boundaries for the future which goes further than what we have so far conceived. To address these concerns and establish a strategy that will achieve a broader vision, researchers seek ways to adopt techniques from multiple academic disciplines and draw knowledge from various areas to design complex software based systems.

DIGITALISATION OF INDUSTRY, INFRASTRUCTURE AND E-MOBILITY

Digitalisation of industry, vehicles, planes, infrastructure, services leads to new system and software architectures, new standards to be followed, new use cases, new service models, and so forth. The EU Blueprint projects DRIVES/ALBATTS came up with a set of major drivers of change which are used as thematic paper topics.

SPI MANIFESTO AND GOOD AND BAD SPI PRACTICES

Values and principles of the SPI Manifesto, organisational best practices, experiences with bad practices, update of the SPI-Manifesto with new success stories submitted in 2023.

FUNCTIONAL SAFETY AND CYBERSECURITY

ISO 26262 and IEC 61508 experiences, automotive/aerospace/medical device related safety norms, integrated safety and Automotive SPICE assessments, design patterns, SEooC strategies, FTA, diagnostic coverage, FIT, new norms, SOTIF - Safety Of The Intended Functionality.
SAE J3061, ISO 21434, ISO 27000, cybersecurity norms, experiences with cybersecurity methods (STRIDE, EVITA, etc.). Specific experiences with attack trees, cybersecurity concepts, new system and software architectures and networks. Integrating functional safety and cybersecurity.

AGILE AND LEAN

The Agile Manifesto, lean and agile, best practices in development, improvement projects, business processes. Agile in industry branches such as Automotive, IT services, aerospace, medical devices, and production.

ACCESSIBILITY, TEAM SKILLS AND DIVERSITY

Accessibility as a chance for new services and innovation, social and complementary skills needed in nowadays distributed and networked engineering and production. Effective teams, communication, compliance, terminology, acceptance of process improvement, and organisational leadership styles. Design patterns for effective networks and organisations.

STANDARDS AND ASSESSMENT MODELS

ISO/IEC, SAE, IEEE standards/guidelines to be considered in systems, software services assessment, development, improvement, ISO/IEC 330xx norm series, IATF 16949, ISO 26262 and new Norm Parts published in 2018,VDA Blue Gold Book, Automotive SPICE 3.1, Volkswagen KGAS Criteria, SOTIF - Safety of the Intended Functionality, SAE J3061 Cybersecurity Norm, ISO 27000 Security Norm, ISO 20000 Service Norm, New norms to be considered, including System of Systems (SoS) considerations.

INNOVATION (NEW SERVICE MODELS, AI, MACHINE LEARNING)

New topics can be proposed for the workshop such as service innovation models, new business models for e-mobility, machine learning, artificial intelligence, etc.

VIRTUAL REALITY / AUGMENTED REALITY / MIXED REALITY

The spectrum of application domains for Virtual Reality (VR), Augmented Reality (AR) and Mixed Reality (MR) is constantly increasing, no matter if in entertainment, retail, marketing, manufacturing, logistics, healthcare or space exploration. And there is a huge potential in interdisciplinary teamwork. The aim of this workshop is to explore both technical and methodological aspects of Virtual Reality, Augmented Reality, Mixed Reality, through dynamic and reciprocal exchange of knowledge and experience.

NEW IDEAS FOR FUNDING PROPOSALS

Presentations and discussions about new EU funding proposals and partnerships.

MEDICAL BIG DATA & IT SYSTEMS & STANDARDS

Medical devices became complex IT systems, integrating new technologies, and connecting systems. This workshop is about the management, design and experience wit such complex systems. It is also about how medical norms help to achieve a high reliability, safety, and quality of such systems.
ASSOCIATED TECH DAYS

On 29.8.2022 before the EuroAsiaSPI² 2022 conference there will be a free associated tech day.

Thematic workshop papers will be published in the **Springer CCIS Series as a special chapter in the book.** 18 selected research papers will be published in the **Springer CCIS Series** in a research chapter. **10** papers will be selected for **publication in the Wiley Journal of SW Evolution and Process series.** Further selected extended papers will be invited to additional cooperating journals .

A EuroAsiaSPI² 2022 journals editorial team will select papers from the book and propose an extended version (50% must be different) to be published in the WILEY Journal of Software: Evolution and Process (SPI Best Practices), and other cooperating journals.

Papers should follow the SPRINGER CCIS series formatting guidelines. Writing instructions, templates and how to upload papers can be found at **https://www.eurospi.net**. **Select** EuroAsiaSPI² 2022 and then **the menu SUBMISSION.**

Springer **WILEY**

NETWORKING

We believe that networking and fostering and establishing research and business relationships is essential for growing a sustainable community of improvement and innovation. While the conference offers ideas, presentations, discussions, during the day, the social talks after the conference are equally important to establish trust and partnerships. **Join the networking space and social events.**

We truly believe that SPI must involve people actively and affect their daily activities (Value A, SPI Manifesto).

RESEARCH & Industry Sandwich

Research papers will not be presented in an extra research stream, but will be integrated as research sessions into the thematic workshops/streams in a sandwich position between industry papers. This will create a better integration and networking of research and industry / applied science and fertilize the grounds for a technology transfer at european level.
