

Capability Adviser in 2026

Current developments and outlook

Design Philosophy – 4 Elements

Foundation

Features need a foundational context to stand upon, else the user experience suffers.

The earth we stand upon.

Clarity

Making sure there is enough „room“ for thought, both inside and outside the tool.

As easy as breathing.

Adaptability

Being able to quickly and precisely adapt to changes in the context surrounding our work.

Flowing like water.

Focus

By bundling our efforts we take bigger steps in a single direction.

Focusing the sun to start a fire.

Foundation – Knowing what we are (and maybe aren't)

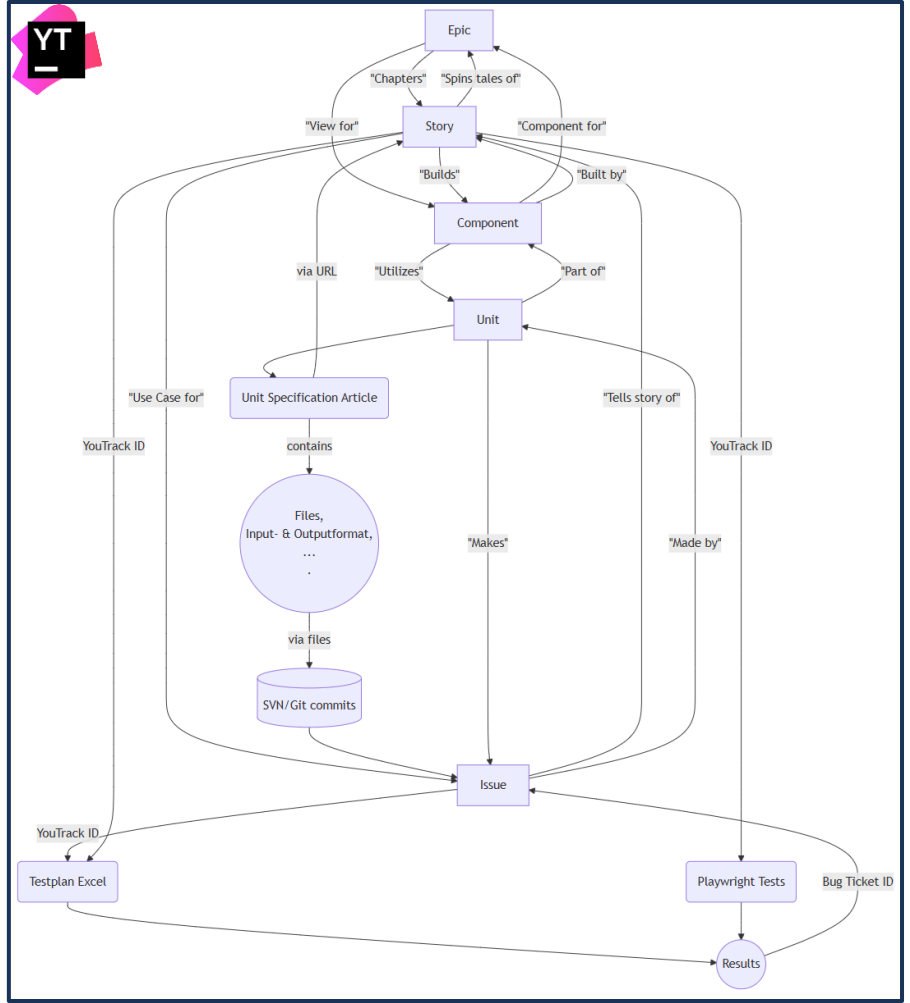

Adaptability – Active Involvement

- Conference
- Academy
- Certification

... and more!

Clarity – Intuitive Design Language

GP 2.1.1 Identify the objectives and define a strategy for the performance of the process.

Check again

The scope of the process activities including the management of process performance and the management of work products are determined. Corresponding results to be achieved are determined. Process performance objectives and associated criteria are identified. Assumptions and constraints are considered when identifying the performance objectives. Approach and methodology for the process performance is determined.

Focus – Capability Adviser Release Themes

Version 8.3 (2022)

Data

Addition and improvements to data collection and data export capabilities.

Version 9.0 (2023)

Modernization

Backend improvements and refactoring through PHP 8.2 update of the codebase.

Version 9.1 (2024)

User Interface

Increasing number of views needed a better UI to provide a smooth experience.

Version 9.2 (2025)

Functional Safety

ASPICE assessments and Safety audits with separate ratings and ISO26262 mapping.

Version 9.3 (2026)

Productivity

Reuse of available resources and faster workflows to increase efficiency.

Version 9.4 (2027)

???

More on this later...

Version 9.3 – The Productivity Release

Search (& Replace) text throughout the whole assessment.

Search & Replace

Configure shorthands and their respective fulltexts for faster typing of repeated phrases and terms.

Auto-Complete

Chat with Co-Assessors without needing to leave the tool.

Chat

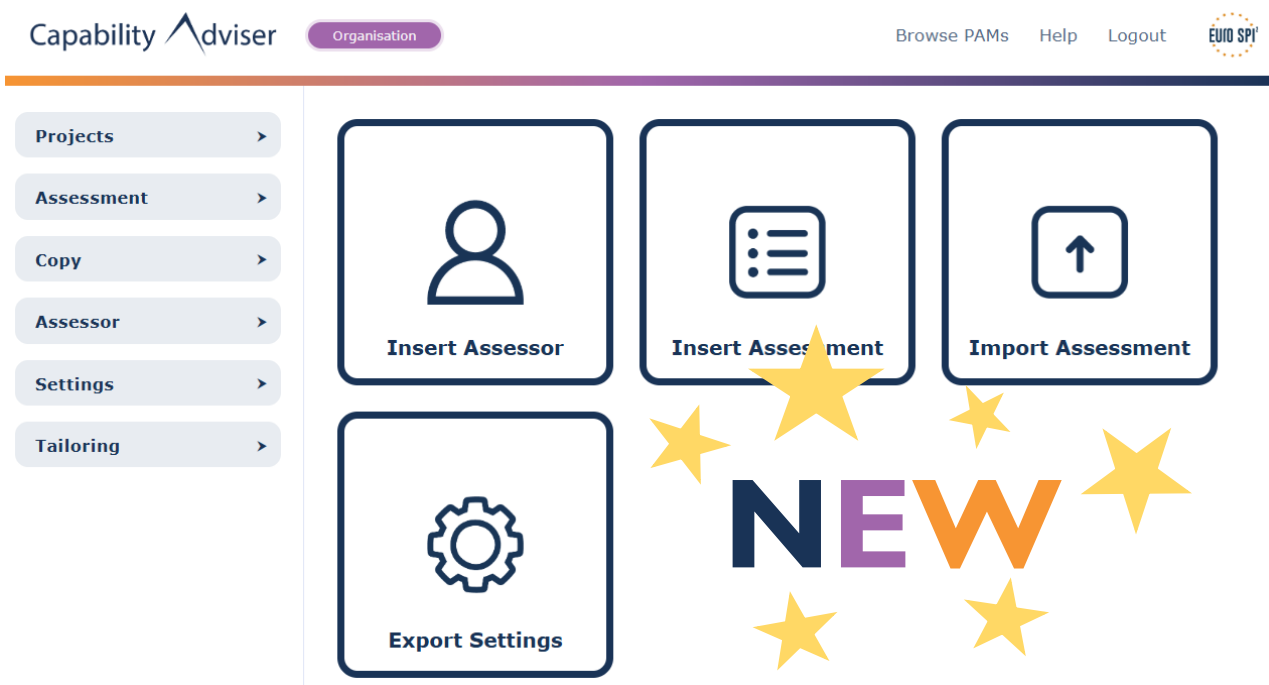

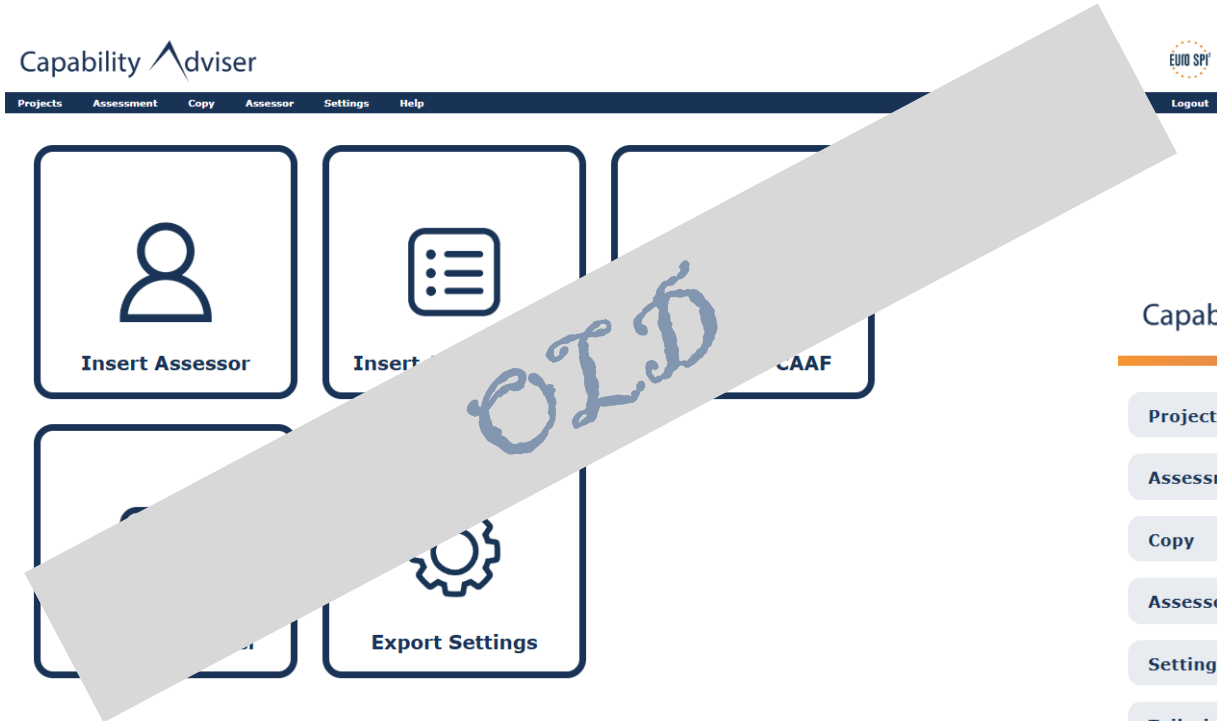

Use the PowerUser Terminal to speed up your entire workflow.

Terminal

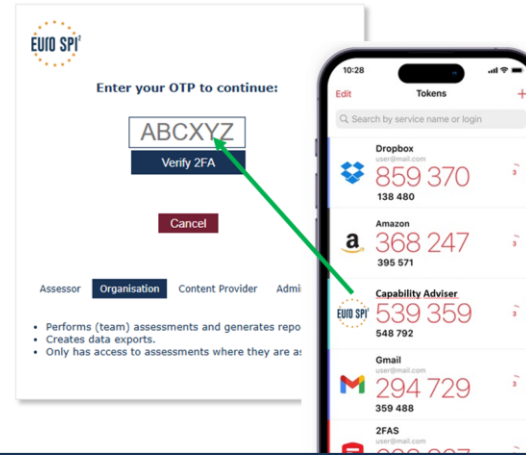

Version 9.3 – Administrative UI Update

INCREASED SECURITY – 2FA

As we grow into a service-based infrastructure that can also support and supply single assessors not part of a large company, we're implementing industry standard 2-factor-authentication.

A user can link any state-of-the-art app with the Capability Adviser to generate time-based one-time passwords (OTPs) as a second means of checking their identity.

ASSESSMENT SCHEDULING

To help our assessors with planning/scheduling assessments, the upcoming Version 9.3 will also boast a Scheduling Wizard.

Based on the scope using during assessment configuration, the tool will allow the users to define session, break and consolidation durations, order of processes and even workday start and end to create a first schedule draft.

The user can then fine tune the schedule to their liking. At any point the schedule can then be exported to PDF for basic sharing or .ical to import into Outlook, Gmail, etc.

Event	Day	Start Time	End Time
MAN 3	15/09/2025	07:00	08:00
Break	15/09/2025	08:00	08:15
SUP 1	15/09/2025	08:15	11:15
Break	15/09/2025	11:15	11:30
SUP 2	15/09/2025	11:30	12:00
Lunch	15/09/2025	12:00	13:00
SUP 3	15/09/2025	13:00	14:30
Break	15/09/2025	14:30	14:45
Consolidation	15/09/2025	14:45	15:45

- Within the tool
- As PDF
- As ICS (calendar import)

MORE TO COME

Single-Sign-On support

Text completion by both defined abbreviations and perhaps even automatic detection

Dedicated „Evidence Users“ with limited access to the findings

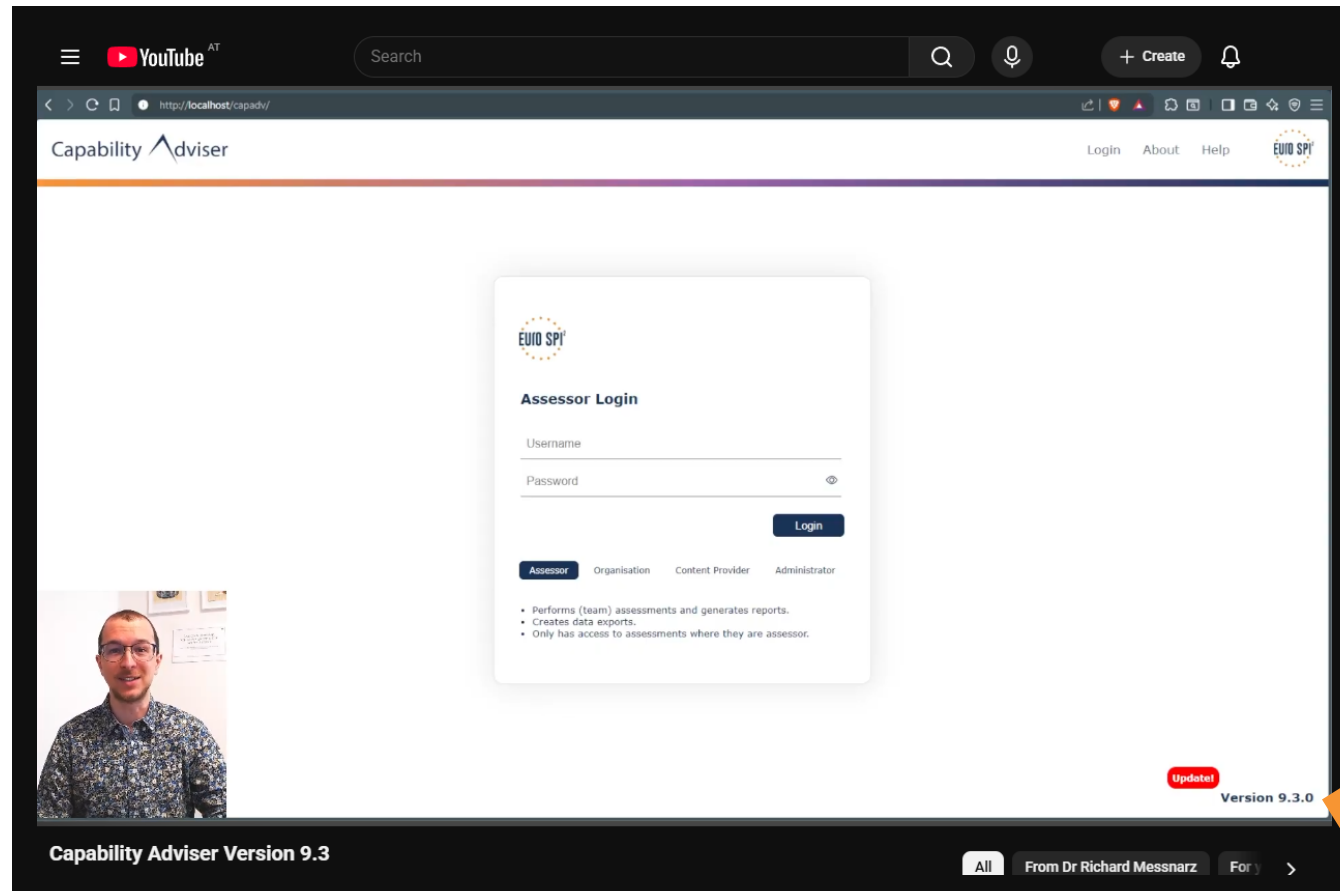

Advanced styling of findings within the tool

Weakness Export with similarity detection to remove redundancies

Search & Replace within the assessment findings

... as well as smaller UI/UX touchups and general improvements

Weaknesses:

The **Project Manual** New Evidence from lorem ipsum text

When highlighting a text in your findings, the tool will offer the option to use the highlighted text as an evidence title.

Parallel to that, you have the option to auto-link evidences, where all practices containing the evidence title in their findings, are linked to said evidence.

New Evidence

Auto-Link Evidences

Import

Export

Sort: Creation (Latest)

Invite Evidence Taker

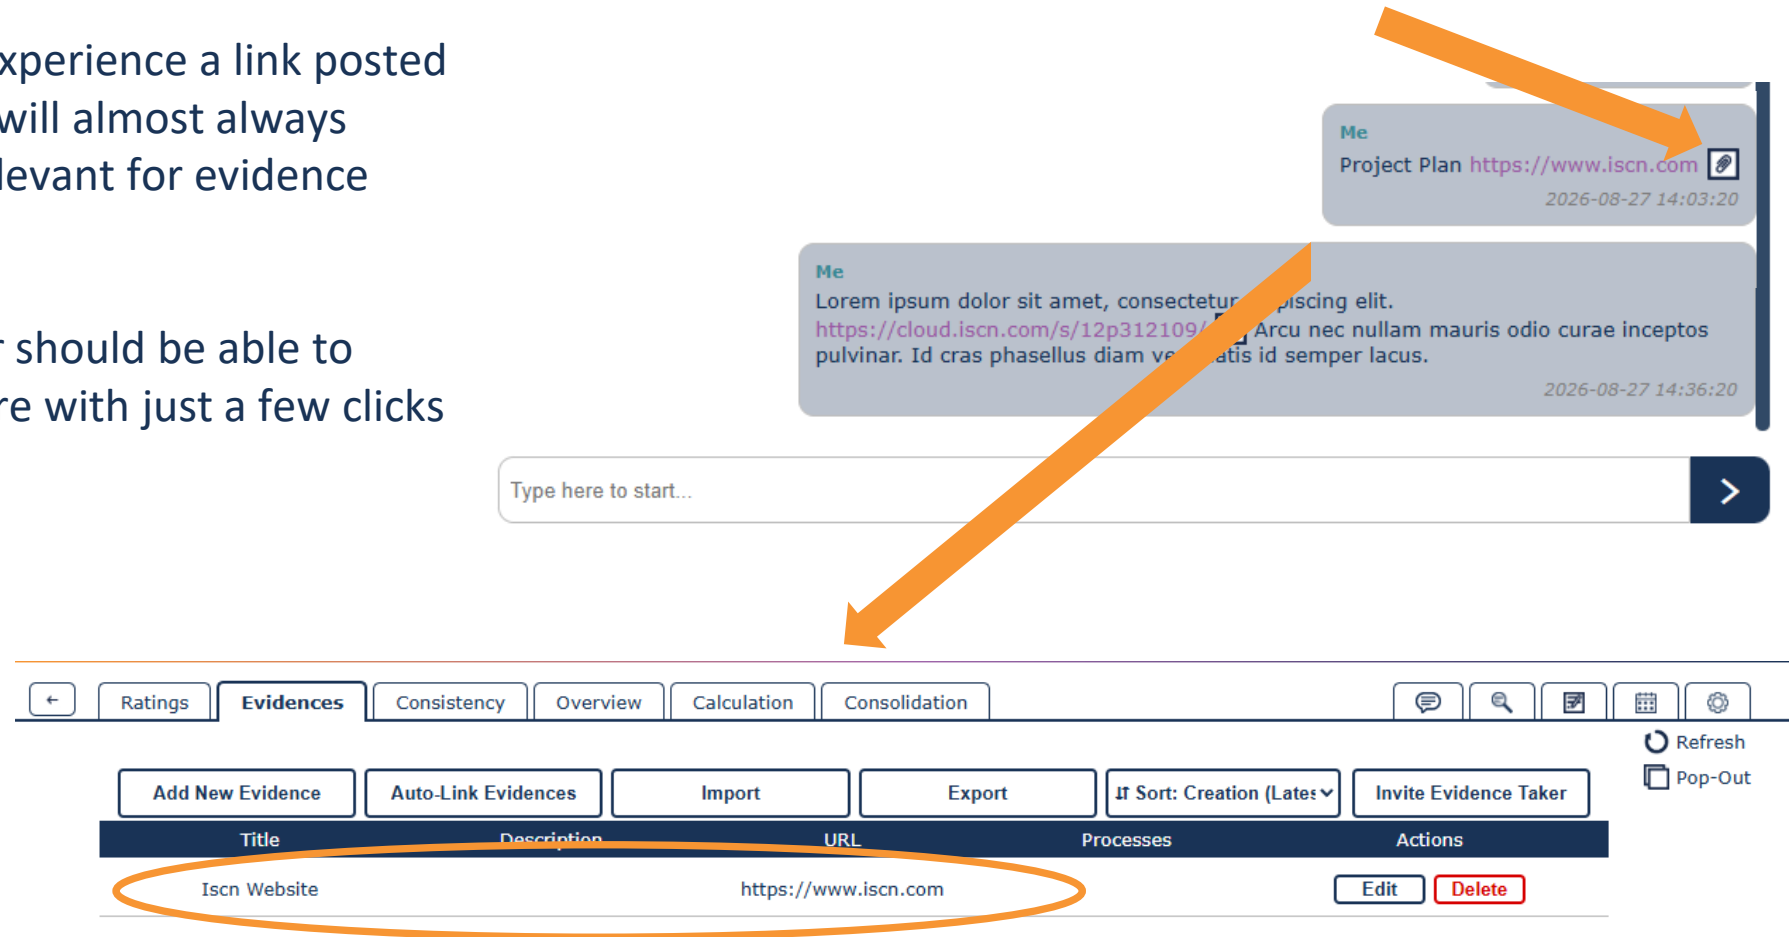

Title	Description	URL	Processes	Actions
Project Manual				EditDelete
Assessment Q1 2025			SUP.1	EditDelete
CapAdv Repository Git			SWE.4	EditDelete
Definition of Done			SWE.4	EditDelete
Batch Strategy			MAN.3	EditDelete

Version 9.4 – A first look

Similarly, from our experience a link posted in the assessor chat will almost always contain data/files relevant for evidence creation.

Therefor an assessor should be able to create one from there with just a few clicks and keystrokes.

The screenshot displays the Capability Adviser interface. At the top, there's a navigation bar with tabs: Ratings, **Evidences**, Consistency, Overview, Calculation, and Consolidation. Below this is a toolbar with buttons: Add New Evidence, Auto-Link Evidences, Import, Export, Sort: Creation (Latest), and Invite Evidence Taker. On the right, there are icons for chat, search, and a calendar, along with 'Refresh' and 'Pop-Out' options.

The main content area shows a table of evidences. The first row is highlighted with an orange oval:

Title	Description	URL	Processes	Actions
Iscn Website		https://www.iscn.com		<button>Edit</button> <button>Delete</button>

Below the table, there's a chat window. It contains two messages from 'Me':

- Project Plan <https://www.iscn.com> (2026-08-27 14:03:20)
- Lorem ipsum dolor sit amet, consectetur adipiscing elit. <https://cloud.iscn.com/s/12p312109/> Arcu nec nullam mauris odio curae inceptos pulvinar. Id cras phasellus diam vestibitis id semper lacus. (2026-08-27 14:36:20)

Below the chat messages is a text input field with the placeholder 'Type here to start...' and a send button (arrow icon).
