What is the DRIVES Learning Platform?

This platform offers courses developed by DRIVES partnership, a blueprint endeavour for sectoral cooperation on skills in the Automotive sector, launched in 2018.

The training materials result from identified reskilling and upskilling needs stemming from the sector after new mobility dynamics and automotive industrial transformations. Further details on DRIVES activities are available here (www.project-drives.eu).

Training courses can be used free of costs by individuals or companies to upskill or reskill their employees or by education and training providers in their courses only through the DRIVES learning platform.

The DRIVES learning platform is being constantly updated. Please Register to attend the courses and receive news about upcoming courses and updates of existing courses.

Feel free to browse through the available courses and their training materials.

Wishing you a nice learning experience!
